

Mobile containerized wastewater treatment and reuse systems

No fixed water supply? Reduce water logistics and ensure operational autonomy.

Plug-and-play

Installed into 10', 20' or 40' container for deployment in 2 hours.

Reusable Water

For technical or potable applications in compliance with regulations.

Deployable Unit

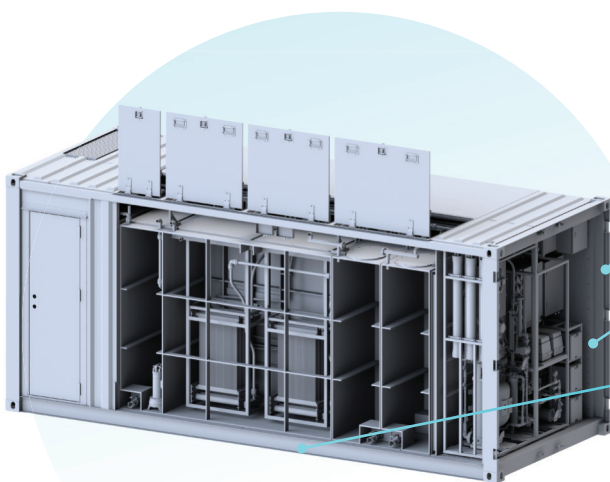

Movable from one site to another with minimal excavation.

Automated System

Fully automated MBR treatment process with sensors and software.

Technology

Reverse osmosis

Optional module to produce potable water

Equipment room

For automation, electrical and mechanical equipment

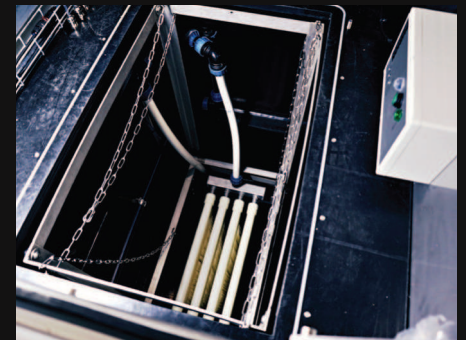

Automated membrane bioreactor

Core process for wastewater treatment

U.S. Army systems

Global Defence Solutions systems for Australia

Paper factory wastewater treatment system
